### **Part III DETAILED ACTION**

Claims 1-21 are currently pending.

#### **Restriction Requirement**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, drawn to first method of predicting secondary structure of a protein, classified in class 702, subclass 19.
- II. Claims 10-14, drawn to second method of predicting secondary structure of a protein, classified in class 702, subclass 19.
- III. Claims 15-21, drawn to computer-readable medium, classified in class 369, subclass 172.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as independent and/or patentably distinct methods which have different modes of operation and different method steps. A reference teaching one method (e.g. teaching superimposition of secondary structure on set of

Art Unit: 1631

topomers) will not necessarily teach the steps of the other method (e.g., generation of 3-D structure, "smart moves", etc).

The computer-readable medium of Group III can contain any type of information, other than the obtained by method I or II. Further, the structure information is non-functional descriptive material which does not bring distinguishing characteristics to the medium of Group III.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1631

remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
